## WORK EXPERIENCE

Grapevine Innovations (Feb 2021 - Present)

I am responsible for :

- Integrating the front-end designs into the application.
- Integrating data from various back-end services and databases.
- Implementing adequate security and data protection measure in your applications.
- Researching and implementing key technologies, architectures to ensure technology stack remains modern.
- Implementing automated testing platforms and unit tests.
- Creating database schemas that represent and support business processes.
- Optimizing applications for maximum speed and scalability.
- Working with teams to ensure that user-interface satisfy usability and performance needs.

## PROJECTS

- Wesonline is a virtual work experience scheme that provides young people, students with the opportunity to experience in the workplace, develop their skills, boost their employability and explore new job roles.
- Learnerkia is an advanced software-as-a-service(saas)-based, digital content-driven and edtech platform.
- PayLaterhub is premium marketplace where you can shop for food items and essential services and pay later.
- Yahshud provides a platform for small investors with limited capital to add real estate to their investment portfolio and participate in a typically sophisticated, high-entry level market.
